Bachelor of Science - Computer Science  
Bachelor of Arts - Film Production

December 4<sup>th</sup>, 2021

GPA - 3.34

## Technical Skills

**Languages:** Java, JavaScript, HTML, CSS, SQL (MySQL/NoSQL), Python, Linux

**Frameworks:** Node.js, Bootstrap, Express.js, React, MaterialUI, Mongoose /MongoDB, JSON, jQuery

**Developing Tools:** Git, Postman, Heroku, Android Studio, Adobe Suite, Selenium, REST API, Office Suite, Passport

## Experience

### Company 3

May 2022 - Current

#### *Vault Technician*

Atlanta, GA

- Collaborated with cross-functional teams including sound department, color department, dailies operators, and producers to fulfill requests for file pulls, pushes, uploads, and transfers, ensuring efficient workflows.
- Troubleshoot technical issues within MediaPulse and Adobe Access, providing timely resolution to minimize disruptions in day-to-day operations.
- Developed a solution to resolve a critical issue with Adobe Access, enabling shared access to the label-making database among team members. Created detailed documentation for future reference, aiding new hires and team transitions.

### Mailchimp Launchpad Program

August 2021 - December 2021

#### *Professional Development Program Exposing Various Tech Careers*

Remote

- Participated in real-world projects covering topics such as Infrastructure Ops, Software Development, Quality Assurance/Test Automation, Security, and Data Analytics.
- Collaborated in a small team to create the Mailchimp: On-The-Go Marketing App, a web-based project emulating the mobile application. Leveraged modern web development technologies to match Mailchimp's branding and design, incorporating JavaScript, CSS, Bootstrap, Express.js, Node, Git, and Adobe Photoshop.

### IBM Accelerate Program

June 2021 - August 2021

#### *Professional Development Program in Software Development*

Remote

- Completed a rigorous 6-week program focusing on software development, enhancing skills in JavaScript, React, Node, Material UI, and agile methodologies. Improving competency in both front-end and back-end development.
- Utilized agile development methodologies by organizing projects into sprints and conducting regular stand-up meetings for planning and coordination.
- Collaborated with team members using Git/Github for version control, ensuring seamless integration of individual contributions to the projects.

### Mailchimp

August 2019 - December 2019

#### *Technical Content Producer | Internship*

Atlanta, GA

- Captured and edited high-quality screen captures using ScreenFlow 8/9 to create instructional videos for the Mailchimp knowledge base, which receives an average of approximately 1.3 million monthly users.
- Covered technically advanced topics, leveraging my computer science background, with a focus on Mailchimp's API. Topics included E-Commerce integration, Nav-Bar updates, creating custom APIs, and OAuth2 system updates, demonstrating an understanding of RESTful Routing techniques and API call interactions.

## Projects

### Mailchimp: On-The-Go Marketing - Full-stack Developer

Sept 2021 - Nov 2021
