Experience

Company3

Vault Technician | Atlanta, GA 05/2022 to Current

- Managed the intake and organization of physical hard drives containing video and audio data from on-set production, ensuring seamless access to footage and data for the production teams.
- Collaborated with cross-functional teams including sound department, color department, dailies operators, and producers to fulfill requests for file pulls, pushes, uploads, and transfers.
- Conducted incoming and outgoing file transfers of client media for commercial, tv, movie, and web usage.

JSquared Productions

Film Editor / 1st Assistant Camera | Atlanta, GA 06/2020 to Current

- Edited and post-produced two award-winning short films showcased at prominent film festivals, utilizing Adobe Premiere Pro.
- Managed camera logistics, such as loading and unloading film or memory cards, battery changes, and data transfers, to support efficient and uninterrupted filming for music videos and short films.
- Assisted in camera setups, including rigging, balancing, and mounting equipment, to achieve desired angles and compositions as directed by the DP.

IBM Accelerate Program

IBM Accelerate Participant | Remote 06/2021 to 08/2021

- Completed a rigorous 6-week program focusing on software development, enhancing skills in JavaScript, React, Node.js, Material UI, and agile methodologies.
- Worked on three projects in small groups, following a two-week sprint structure to develop practical applications utilizing HTML, React, JavaScript, Node, and GitHub.

MailChimp

Technical Content Producer Intern | Atlanta, GA 08/2019 to 12/2019

- Assisted in every stage of the creative video production process including pre-production, scripting/proofreading, filming, post-production, and publishing.
- Captured and edited high-quality screen captures for multimedia usage into instructional videos in Screenflow 8/9 for the Mailchimp knowledge base which, on average, is used by roughly 1.3 million users per month.

OneConnxt LLC.

Broadcast Technician | Stockbridge, GA 11/2017 to 03/2019

- Set up and optimized equipment to maintain signal strength, clarity, and reliability during broadcasts via Linux/Unix systems to remotely connect to encoders, decoders, receivers, and feeders.
